SHANA'S PAW© GRAPHICS—QUALITY DESIGN AT AFFORDABLE PRICES

Do your own printing and save time and money on custom graphics. Shana's Paw© Graphics provides you a high-resolution image file that you can print yourself or have printed by the fine folks at such places as Staples, CVS, Walgreens, FedEx, Wal-Mart, Vistaprint, and Shutterfly. We can customize your design for you—your wording, your colors, your size, your format—usually at no additional cost. (We also can create a new design for you. For more information on that, just e-mail us at ShanasPaw@carolina.rr.com.)

HERE'S HOW IT WORKS

1. Choose a design. (It won't have the Shana's Paw© watermark on it after purchase.)

2. Add the design to the Cart.

3. During Checkout, send us a "Note to Seller" giving us your e-mail address and all of the information we will need to complete your template.

4. If you are using Vistaprint, Shutterfly, or a similar printing service, let us know which service and the card size, so that we can provide you the appropriate size and format of template.

5. If you are getting a photo card template, email your photo to ShanasPaw@carolina.rr.com. For best results, send us your photo as a .jpg, .png, or .tiff file at a resolution of 300 dpi or higher.

   Note: By sending us a photo, you are representing to us that you either are the copyright holder or have the permission of the copyright holder to use the photo for this purpose.

6. As soon as we complete your template, we will e-mail it to you as a high resolution .jpg file or in whatever format you have requested—usually within 24-48 hours.

   Note: If you have asked for extra customization—such as different colors, size, or design elements—we will send you a proof copy for you to approve or request changes. After your final approval, we will e-mail your completed template.

7. Print your cards yourself or use a commercial service.

8. You may print as many copies as you need for your personal or an individual organization's use.

ANSWERS TO FREQUENTLY ASKED QUESTIONS

- We provide .jpg, .pdf, and other types of image files in 300 dpi resolution for good print quality.

- The Shana's Paw© watermark will NOT appear on top of your final design. However, if you have purchased a folded note card or 2-sided card, the company's logo will be on the back of the card—tastefully done, of course ☺.

- A word about colors: Colors are tricky things—they can appear different on different computer screens. Also, the type of printer and the settings used can affect how colors appear. Unfortunately, there is really nothing that Shana's Paw© Graphics can do to overcome this. In our experience, though, making adjustments to the settings on the printer can resolve the issue.

- Although you may print as many copies of your purchased design as you need, all content of ShanasPaw.com and products of Shana's Paw© Graphics are for personal or an individual club, congregation, or organization's use only. You may not use our content, services, or products for resale or commercial purposes. For more information about this, please read our additional Terms of Use.

- Most of the Shana's Paw card designs are sized to fit within standard greeting card envelopes available from office supply dealers. However, if you have requested a custom size and will need matching envelopes, we suggest you check out their availability in time to prevent an unwelcome surprise.

- Most of the Shana's Paw© card designs are sized to be used with commercial stationery products such as those made by Avery Dennison. These often have such features as matching envelopes, micro-perforation for easy separation, and pre-scoring for foldable cards. If you need us to resize a design to fit such products,

just let us know. (And remember to purchase the product that matches your printer—laser, ink-jet, etc. If you will be using a commercial print service, such as Staples, ask if it will use these products; some will not.)
